

Department of Energy

Washington, DC 20585 December 23, 2002

RECEIVED 2003 JAN -6 PM 3:54 DNF SAFETY BOARD

The Honorable John T. Conway Chairman Defense Nuclear Facilities Safety Board 625 Indiana Avenue, NW Washington, D.C. 20004

Dear Mr. Chairman:

The Office of Environment, Safety and Health (EH) has the responsibility for implementing Department of Energy (DOE) Policy 411.1, *Safety Management Functions, Responsibilities and Authorities*, and a major portion of this duty is maintaining the Department's corporate-level *Functions, Responsibilities, and Authorities Manual* (FRAM). As required by this manual, each Departmental office having environment, safety, and health functions must maintain an office-level document outlining the assignments within that office of the responsibilities the office holds under the FRAM. The recently revised EH Functions, Responsibilities and Authorities (FRA) document is enclosed.

The EH FRA document addresses the safety management activities assigned to EH in the draft of the FRAM (Draft DOE Manual 411.1-1C) that is currently being coordinated within the Department's Directives system. We issued the EH FRA document before the issuance of the revised FRAM because we believe that no further changes will occur to the EH responsibilities it contains during the remainder of the coordination process. Both the EH FRA document and the draft FRAM were available to your staff for review and comment.

If you have any questions, please contact me at (202) 586-5161.

Sincerely,

Beverly A. Cook Assistant Secretary Environment, Safety and Health

Enclosure

cc: M. Whitaker, S-3.1

ATEN OF: Office of Nuclear and Facility Safety Policy:MHaughey(301-903-2867)/JRead(301-903-2535)

SUBJECT: Safety Management Functions, Responsibilities, and Authorities of the Office of the Assistant Secretary for Environment, Safety and Health (EH FRA)

ro: Office of Environment, Safety and Health Deputy Assistant Secretaries

Attached for implementation is the Safety Management Functions, Responsibilities, and Authorities of the Office of the Assistant Secretary for Environment, Safety and Health (EH FRA). The EH FRA defines the functions, responsibilities, and authorities for EH management including the EH Deputy Assistant Secretaries (DASs). These functions, responsibilities, and authorities were developed consistent with the soon to be issued update of the DOE M 411.1-1B, Safety Management Functions, Responsibilities, and Authorities Manual (FRAM).

Section 9.2.2.5 of the FRAM requires the Office of Environment, Safety and Health (among others) to develop a FRA document delineating how that office performs the applicable responsibilities in the FRAM. The attached EH FRA fulfills that responsibility.

The EH FRA is expected to be a living document that will be revised as the FRAM is updated and as EH responsibilities change, i.e., through reorganizations or new assignments. If you identify changes or additions that should be made to the EH FRA during its next update, please inform Dick Black at 301-903-3465 or e-mail richard.black@eh.doe.gov.

The EH FRA will be posted on the EH web page.

REPLY TO

ATTN OF: Office of Nuclear and Facility Safety Policy: MHaughey(301-903-2867)/JRead(301-903-2535)

SUBJECT: <u>ACTION</u>: Sign the attached memorandum approving the Safety Management Functions, Responsibilities, and Authorities of the Office of the Assistant Secretary for Environment, Safety and Health (FRA)

ro: Beverly A. Cook, Assistant Secretary, Office of Environment, Safety and Health, EH-1

THRU: Rick Jones, Acting Deputy Assistant Secretary, Office of Safety and Health, EH-5

The attached Safety Management Functions, Responsibilities, and Authorities of the Office of the Assistant Secretary for Environment, Safety and Health (EH FRA) defines the functions, responsibilities, and authorities that apply to the Assistant Secretary for Environment, Safety and Health (EH AS), as well as the EH Deputy Assistant Secretaries (DASs). These functions, responsibilities, and authorities were developed consistent with the DOE M 411.1-1B, Safety Management Functions, Responsibilities, and Authorities Manual (FRAM) as recently revised and expected to be issued shortly.

Section 9.2.2.5 of the FRAM requires the Office of Environment, Safety and Health (EH) (among others) to develop a FRA document delineating how that office performs the applicable responsibilities in the FRAM. The attached EH FRA fulfills that responsibility. It was developed with input from all affected EH offices and concurred on by all EH DASs that have safety management functions.

The EH FRA is expected to be a living document that will be revised as the FRAM is updated and as EH responsibilities change, i.e., through reorganizations or new assignments. It also is a useful knowledge management tool that establishes key functions and responsibilities for use both within and outside of EH.

Issuance of the FRA will close out EH's actions for commitment Number 3, action 4 of the Defense Nuclear Facilities Safety Board Recommendation 98-1. Following issuance, we will post the EH FRA on the EH web page.

Safety Management Functions, Responsibilities, and Authorities of the Office of the Assistant Secretary for Environment, Safety and Health

1.0 INTRODUCTION

Department of Energy (DOE) Manual (M) 411.1-1B, "Safety Management Functions, Responsibilities, and Authorities Manual," describes the DOE "corporate" functions, responsibilities, and authorities for conducting operations safely at DOE facilities. The Manual is based on and organized around the five core safety management¹ functions of the DOE Integrated Safety Management System (ISMS) described in DOE Policy (P) 450.4, "Safety Management System." DOE M 411.1-1A requires that each DOE organization that has a direct or indirect effect on the safe management of work conducted at DOE facilities develop a document that describes the organization's safety management functions, responsibilities, and authorities as they relate to these five core safety management functions.

This document describes the environmental, safety, and health (ES&H) management functions, responsibilities, and authorities of the Office of Environment, Safety and Health (EH). While EH does not have direct line safety management functions and responsibilities, it does have functions and responsibilities to establish the ES&H policy, requirements and standards necessary for safely conducting DOE activities. It also has functions and responsibilities to establish and manage DOE corporate safety programs; to support DOE senior and line management in assuring that DOE and its contractors are performing work in a safe, effective, and responsible manner; and to investigate and enforce potential violations of nuclear safety rules.

2.0 ORGANIZATION AND MISSION

The Assistant Secretary for Environment, Safety and Health serves as the designated safety official and the principal advisor to the Secretary of Energy on matters relating to protection of the environment, workers, and the public from hazards posed by DOE facilities and operations. The Office's overall mission is to accomplish the following:

Develop and maintain DOE ES&H policy, requirements, standards and guidance;

Serve as DOE's "corporate" advocate to advise the Secretary, the Administrator of the National Nuclear Security Administration (NNSA), the program secretarial officers (PSOs), and the field element managers (FEMs) on ES&H issues and performance trends;

¹ In the context of DOE's integrated safety management system, the term "safety" encompasses "environment, safety and health" functions to the extent that those functions relate to the safe management of DOE facilities or activities.

- Establish and manage DOE corporate safety programs that are considered necessary to meet ES&H requirements or to fulfill DOE expectations for the safe and healthy conduct of work at DOE sites;
- Support DOE's position and coordinate interaction with regulators and other external stakeholders for development of ES&H regulations and standards and provide guidance to the Secretary, the PSOs, and the FEMs in response to changing external requirements;
- Provide ES&H technical resources and programs that support and assist line management in fulfilling DOE's mission;
- Investigate and issue or recommend enforcement actions for violations by contractors of nuclear safety requirements under the Price-Anderson Amendments Act of 1988 provisions of the Atomic Energy Act (AEA); and
- Promote the health of DOE workers and communities.

The eight offices within EH listed below support its overall mission. Table 1 of this document lists the specific functions and responsibilities of each of the listed offices that pertain to safety management, but it does not list all EH functions as not all of the functions and responsibilities performed by EH (e.g., health studies and worker advocacy functions) pertain to the safe management of DOE facilities or activities.

Deputy Assistant Secretary for Corporate Safety Assurance (EH-2).

EH-2 serves as a corporate asset to the Department, stakeholders, and line management in assessing, facilitating, achieving, and assuring excellence and continuous improvement in ES&H management and performance. EH-2 employs proven techniques and activities, such as management-requested field assessments and technical support, safety analysis reviews, event and accident investigations, operational readiness reviews, special reviews, and support of the integration of safety into DOE projects. The Office also coordinates resolution of cross-cutting issues and provides support to the DOE Emergency Management Team.

Deputy Assistant Secretary for Performance Assessment and Analysis (EH-3).

EH-3 provides independent technical evaluation of the Department's effectiveness, vulnerabilities, and trends in protecting the public, the workers, and the environment. It serves as the focal point for the collection, analysis, and dissemination of environment, safety, and health performance data and for ensuring ES&H is adequately addressed in DOE contracts. The Office manages the DOE Lessons Learned and Operating Experience Program including the dissemination of best practices. EH-3 also serves as the sponsor for dissemination of Integrated Safety Management (ISM) resource information.

Deputy Assistant Secretary for Environment (EH-4).

EH-4 promotes environmentally responsible management practices throughout DOE and supports program and field offices in achieving this end by providing guidance in meeting current and oncoming compliance issues. EH-4 provides the central Department coordinating point on environmental requirements and regulations proposed by DOE and other Federal agencies. EH-4 also establishes DOE-wide policies and guidance for environmental protection and compliance and promotes national environmental goals through effective National Environmental Policy Act (NEPA) compliance, which includes independent review and approval of NEPA documents.

Deputy Assistant Secretary for Safety and Health (EH-5).

EH-5 develops, manages, and directs comprehensive programs that provide effective health and safety policy, requirements, guidance and technical standards that address the hazards (e.g., nuclear, industrial, chemical, and biological) of DOE activities. The office also maintains a formal liaison with external safety and health regulators, internal DOE program and line elements, contractor organizations, and external organizations relating to health and safety policy and standards. The Office develops and manages many Department-wide health and safety programs designed to improve safety performance, including the DOE Technical Standards Program.

Deputy Assistant Secretary for Health Studies (EH-6).

EH-6 promotes the health of DOE workers and communities surrounding DOE sites by developing and managing programs that focus on providing medical information and policy, and by producing epidemiologic studies that furnish information applicable to the prevention of illness and injury. EH-6 shares exposure and medical surveillance information with DOE and contractor employees, worker representatives, and the public.

Deputy Assistant Secretary for Planning and Administration (EH-7).

EH-7 provides centralized management and direction of EH-wide planning, budgeting, financial, and program execution processes; ensures that these processes are effective, fully integrated, and consistent with DOE-wide processes and requirements; and provides administrative support to EH's policy development, and oversight programs.

Director, Office of Worker Advocacy (EH-8).

EH-8 helps current and former employees of DOE contractors with qualifying occupational illnesses obtain benefits through State workers' compensation programs. The Office provides worker liaisons with State Workers Compensation offices to facilitate such claims. The Office sponsors an Advisory Committee of stakeholders from State agencies workers unions, medical and public health organizations to advise the Office on its advocacy practices and procedures. EH-8 operates a toll-free hotline for workers who are interested in filing workers' compensation

claims with their state programs or need assistance with previously filed claims and provides education and outreach to workers and their families, unions, and others to inform them about the benefits and assistance available to sick workers and their survivors.

Director, Enforcement and Investigations (EH-10).

EH-10 carries out the Department's function under the Price-Anderson Amendments Act of 1988 provisions of the Atomic Energy Act for investigation and potential enforcement of violations by contractors of DOE nuclear safety requirements.

3.0 DELEGATION OF AUTHORITY

As delineated in DOE M 411.1-1B (the FRAM), the Assistant Secretary for Environment, Safety and Health (AS EH) has various safety management responsibilities. Within EH, these responsibilities are discharged either by the Assistant Secretary or through the respective offices of the deputy assistant secretaries (DASs) and office directors as agents of the Assistant Secretary.

4.0 DOCUMENT CONTROL

The Assistant Secretary for Environment, Safety and Health approves EH's safety management functions, responsibilities, and authorities as described in this document. The Deputy Assistant Secretary for Planning and Administration is responsible for distributing approved copies, and EH-53 is responsible for keeping this document current.

5.0 FUNCTIONS, RESPONSIBILITIES, AND AUTHORITIES

DOE M 411.1-1B lists the functions, responsibilities, and authorities of the Office of the Assistant Secretary for Environment, Safety and Health, either as the sole responsibility of the office, or as a general duty of each Secretarial office. These functions, responsibilities, and authorities correlate to the five core safety management functions described in DOE P 450.4, with the addition of "Provide Direction."

- (A) **Provide Direction.** Those activities which define and shape DOE's missions, such as strategic plans, budget allocation plans, and safety management policies and requirements, are developed and communicated.
- (B) Define Scope of Work. Missions are translated into work, expectations are set, tasks are defined and prioritized, and resources considered.
- (C) Analyze Hazards. Hazards associated with the work are identified, analyzed, and categorized.

- (D) Develop and Implement Controls. Applicable standards, requirements, and controls to prevent/mitigate hazards are identified and agreed upon; the controls are implemented; and the safety envelope is established.
- (E) Perform Work. Readiness is confirmed and work is performed safely.
- (F) Collect Feedback and Pursue Improvement. Feedback information on the adequacy of controls is generated, gathered, and shared; opportunities for improving the definition and planning of work are identified and implemented; line and independent oversight is conducted; and if necessary, regulatory enforcement actions are taken.

6.0 TABLE OF EH SAFETY MANAGEMENT FUNCTIONS/ASSIGNMENTS

EH's specific functions, responsibilities, and authorities are summarized in Table 1. They are organized around the six core safety management functions listed in section 5. The entries in Table 1 are numbered consistent with the FRAM. Not all items from the FRAM are listed in the Table 1. The only FRAM entries listed in Table 1 are those which contain responsibilities and authorities which apply to EH; hence the numbers are not sequential.

7.0 TABLES OF DOE RULES AND DIRECTIVES FOR WHICH EH IS THE OFFICE OF PRIMARY INTEREST (OPI)

Table 1 identifies a number of unique functions and responsibilities for rules and directives for when EH is the OPI. Tables 2 and 3 list the specific DOE rules and DOE directives for which EH is the OPI and identifies the offices in EH that are responsible for each of these rules and directives.

|------------|--|---|-----------|
| | c. Support other Secretarial Officers designated as cognizant for responding to and implementing Board recommendations. d. Designate and empower a single point of contact within EH to represent EH and work with the Departmental Representative and his/her staff in Board-related matters | desired. e. Keep the cognizant Secretarial Officer informed of any issues that need senior management attention. f. For cross-cutting issues, coordinate with the appropriate Headquarters and field managers in the other organization to implement the safety issue resolutions, consistent with the boundaries and authorities established by the controlling plan, commitment documents, or organizational memorandums of agreement. | |
