PART 1651—DEATH BENEFITS

§ 1651.2 Entitlement to funds in a deceased participant’s account.

* * * * *

(d) * * * The account will accrue earnings at the G Fund rate in accordance with 5 CFR part 1645 until it is paid out or a beneficiary participant account is established under this part.

§ 1651.19 Beneficiary participant accounts.

* * * * *

(a) * * * Regardless of the allocation of the deceased participant’s account balance at the time of his or her death, each beneficiary participant account, once established, will be allocated 100 percent to the age-appropriate TSP Lifecycle Fund based on the beneficiary participant’s date of birth. * * *

§ 1601.22 [Amended]

5. Amend § 1601.22 by removing paragraph (a)(3).

6. Amend § 1601.33 by revising the first sentence of paragraph (a), to read as follows:

§ 1601.33 Acknowledgement of risk.

(a) A uniformed services participant or a participant enrolled prior to September 5, 2015 who wants to invest in a TSP Fund other than the G Fund must execute an acknowledgement of risk for that fund. * * *

Dated: August 21, 2015.

Mark T. Welch,
General Manager.

[FR Doc. 2015–21302 Filed 8–27–15; 8:45 am]

BILLING CODE 6760–01–P

SUMMARY: The Defense Nuclear Facilities Safety Board is publishing its Freedom of Information Act (FOIA) Fee Schedule Update pursuant to the Board’s regulations.

DATES: Effective September 1, 2015.

SUPPLEMENTARY INFORMATION: The FOIA requires each Federal agency covered by the Act to specify a schedule of fees applicable to processing of requests for agency records. 5 U.S.C. 552(a)(4)(A)(i). On July 9, 2015 the Board published for comment in the Federal Register its Proposed FOIA Fee Schedule, 80 FR 39389. No comments were received in response to that notice, and the Board is now establishing the Fee Schedule.

Pursuant to 10 CFR 1703.107(b)(6) of the Board’s regulations, the Board’s General Manager will update the FOIA Fee Schedule once every 12 months. The previous Fee Schedule Update went into effect on June 1, 2014. 79 FR 31848.

Board Action

Accordingly, the Board issues the following schedule of updated fees for services performed in response to FOIA requests:
DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc. Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Bombardier, Inc. Model CL–600–2C10 (Regional Jet Series 700, 701, & 702) airplanes, Model CL–600–2D15 (Regional Jet Series 705) airplanes, Model CL–600–2D24 (Regional Jet Series 900) airplanes, and Model CL–600–2E25 (Regional Jet Series 1000) airplanes. This AD was prompted by results of a design review indicating that the burst pressure of the flexible hose, used to vent oxygen from the high-pressure relief valve of the oxygen cylinder overhead, was lower than the opening pressure of the high-pressure relief valve, which could cause the flexible hose to burst before it can vent the excess oxygen overboard. This AD requires replacing the oxygen hose assembly with a new, improved assembly. We are issuing this AD to prevent the accumulation of oxygen in an enclosed space, which could result in an uncontrolled oxygen-fed fire if an ignition source is nearby.

DATES: This AD becomes effective October 2, 2015.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of October 2, 2015.

For service information identified in this AD, contact Bombardier, Inc., 400 Côte-Vertu Road West, Dorval, Québec H9S 1Y9, Canada; telephone 514–855–5000; fax 514–855–7401; email thd.cf@aero.bombardier.com; Internet http://www.bombardier.com. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at http://www.regulations.gov by searching for and locating Docket No. FAA–2015–0822.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Bombardier, Inc. Model CL–600–2C10 (Regional Jet Series 700, 701, & 702) airplanes, Model CL–600–2D15 (Regional Jet Series 705) airplanes, Model CL–600–2D24 (Regional Jet Series 900) airplanes, and Model CL–600–2E25 (Regional Jet Series 1000) airplanes. The NPRM published in the Federal Register on April 13, 2015 (80 FR 19574).

Transport Canada Civil Aviation (TCCA), which is the airworthiness authority for Canada, has issued Canadian Airworthiness Directive CF–2014–37, dated October 17, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for certain Bombardier, Inc. Model CL–600–2C10 (Regional Jet Series 700, 701, & 702) airplanes, Model CL–600–2D15 (Regional Jet Series 705) airplanes, Model CL–600–2D24 (Regional Jet Series 900) airplanes, and Model CL–600–2E25 (Regional Jet Series 1000) airplanes. The MCAI states:

Design review found that the burst pressure of the flexible hose, used to vent oxygen from the high-pressure relief valve of the oxygen cylinder overhead, is lower than the opening pressure of the high-pressure relief valve. This could cause the flexible hose to burst before it is able to vent the excess oxygen overboard. If an ignition source is present, the accumulation of oxygen in an enclosed space may result in an uncontrolled oxygen-fed fire.

The MCAI states:

Design review found that the burst pressure of the flexible hose, used to vent oxygen from the high-pressure relief valve of the oxygen cylinder overhead, is lower than the opening pressure of the high-pressure relief valve. This could cause the flexible hose to burst before it is able to vent the excess oxygen overboard. If an ignition source is present, the accumulation of oxygen in an enclosed space may result in an uncontrolled oxygen-fed fire.

We partially agree with the requests. We have changed the compliance time in paragraph (g) of this AD to “Within 5,800 flight hours or 44 months after the effective date of this AD, whichever occurs first.” This change matches the compliance time listed in the MCAI, and will allow operators to remain in compliance.

We do not agree that the compliance time should be extended to “Within 6,000 flight hours, or within 44 months after the effective date of this AD, whichever occurs first.” After
