DNFSB Pandemic Response and Recovery Plan Revision 1

I. Overview

Introduction. The Defense Nuclear Facilities Safety Board (DNFSB or “the Agency”) Pandemic Response and Recovery Plan (“Plan”) has been developed to protect the DNFSB workforce, contractors, other building occupants, and visitors to the DNFSB and to stop the spread of the coronavirus disease 2019 (COVID-19) pandemic. The Plan supersedes Revision 0 of the DNFSB Pandemic Response and Recovery Plan, dated September 14th, 2020 and implements the Executive Order (EO) 13991, *Protecting the Federal Workforce and Requiring Mask-Wearing*, issued on January 20, 2021, and Office Management and Budget (OMB) Memorandum 21-15, *COVID-19 Safe Federal Workplace: Agency Model Safety Principles*, issued on January 24, 2021. The Plan consists of safety principles implemented DNFSB-wide at all official worksites around the nation and applies to all on-duty or on-site federal DNFSB employees, on-site federal contractors, and any other person in DNFSB space.

According to EO 13991, the policy of the U.S. Government is “to halt the spread of COVID-19 by relying on the best available data and science-based public health measures,” including taking a science-based and data-driven approach to safety in federal workplaces. The health and safety of the federal workforce is the Administration’s highest priority. DNFSB is committed to protecting individuals in its facilities from the effects of the COVID-19 pandemic, while preserving the Agency’s ability to complete its mission.

The President has established a Safer Federal Workforce Task Force to assist federal agencies with implementing safety plans relative to health, safety, and workplace operations. This Plan will be updated as the Safer Federal Workforce Task Force issues new guidance.

Safety Principles. With DNFSB’s goals of responding to and mitigating the impact of COVID-19, workforce safety and health remain our number one priority. DNFSB has adopted the Government-wide Safer Workforce Task Force’s model safety principles, which are consistent with current Centers for Disease Control and Prevention (CDC) guidance, and incorporated those principles into this plan.

Health and Safety

- Telework
- Face Masks/Coverings
- Testing
- Contact Tracing
- Travel Protocols
- Symptom Monitoring
- Quarantine and Isolation
- Vaccinations

Workplace Operations

- Occupancy
- Physical Distancing
- Environmental Cleaning
- Hygiene and Sanitization
- Ventilation and Air Filtration
- Visitors
- Elevators
- Shared Spaces

These safety principles are discussed in detail in Section II, *Health and Safety*, and Section III, *Workplace Operations*.

DNFSB Pandemic Response Working Group. The DNFSB Pandemic Response Working Group¹ (Working Group) includes representatives from the following DNFSB groups:

- a) Division of Operational Services (DOS);
- b) Division of Human Resources (DHR);
- c) Division of Information Technology (DIT);

¹ OMB Memorandum 21-15 recommends establishing a “COVID-19 Coordination Team;” at DNFSB, this role of the COVID-19 Coordination Team is fulfilled by the Pandemic Response Working Group in coordination with the DNFSB Office Directors.

DNFSB Pandemic Response and Recovery Plan Revision 1

- d) Office of the General Counsel (OGC);
- e) Office of the Technical Director (OTD); and
- f) Others, as directed by the Executive Director of Operations.

The Working Group will assess and work with Office Directors² to establish, implement, and monitor DNFSB's compliance with:

- a) implementing safety protocols for physical space and mask-wearing;
- b) making determinations of on-site and telework/remote working;
- c) responding to and mitigating the impact of COVID-19; and
- d) providing notification protocols.

The Working Group will also work to identify areas of improvement and risk that will need to be addressed and funded appropriately. Where appropriate, the Working Group may consult with the General Services Administration (GSA), the Office of Personnel Management (OPM), the Office of Management and Budget (OMB), the Small Agency Council (SAC), and the Facility Security Committee (FSC).

Remote Employees. The Plan's safety principles also apply to DNFSB employees working in field locations, including resident inspectors. Applicable elements include, but are not necessarily limited to, the following:

- Symptom Monitoring;
- Physical Distancing; and
- Quarantine and Isolation.

Given the unique circumstances at each field location, the responsible Office Director will issue supplementary direction as needed.

Training and Communication. DNFSB employees and contractors will be provided training on the Plan, including familiarization with facility access requirements. This will include initial training, with recurring or refresher training being provided as necessary.

DNFSB will maintain transparent communication with the workforce and key external stakeholders as it plans and initiates pandemic response measures. DNFSB will continue to use a variety of communication methods to help connect the workforce to information about the return-to-workplace process. This Plan will be posted on the DNFSB's public website.

Reporting Unsafe Conditions. Section 5(a)(1) of the Occupational Safety and Health Act requires the DNFSB to provide a place of employment free from recognized hazards that are "causing or are likely to cause death or serious physical harm." Employees may disclose health or safety violations or concerns about workplace safety and health to DNFSB management officials, an Equal Employment Opportunity (EEO) counselor, the Occupational Safety and Health Administration (OSHA), or the Office of Inspector General (OIG) without fear of reprisal. The DNFSB will not retaliate against an employee for raising any workplace and safety concerns.

If an employee believes that he or she has been retaliated against for raising substantial and specific safety or health violations to management, an EEO counselor, OSHA, and/or the OIG, he or she may file a complaint with the Office of Special Counsel (OSC). In addition to filing a complaint with OSC, federal employees may also contact OSHA's Office of Federal Agency Programs if they believe that they are being retaliated against for filing with OSHA.

² Office Directors include the Executive Director of Operations, General Counsel, General Manager, Technical Director, and any designees.

DNFSB Pandemic Response and Recovery Plan Revision 1

Approval Authority. The Office Directors will be responsible for implementation of the Plan. The Office Directors can jointly approve changes to the Plan based on updated guidance or lessons learned, but will inform the Board of any implementation issues and prior to any significant changes. The Board will make decisions on any changes to the safety principle strategy and will make decisions on when to require employees to return to work on-site at DNFSB duty locations. The DNFSB Chair, as advised by Office Directors and the Pandemic Response Working Group, must approve any exemptions to the Plan.

**DNFSB Pandemic Response and Recovery Plan
Revision 1**

II. Health and Safety

Telework. Although the DNFSB headquarters and Department of Energy defense nuclear facility worksites remain open, consistent with OMB guidance, federal employees are strongly encouraged to maximize telework and limit their physical presence at the office/worksites. Supervisor permission is required for an employee to come into the office. When social distancing strategies are being utilized to promote workplace safety, telework is a key part of the approach. Consequently, every effort will be made to allow and encourage eligible employees' use of approved telework locations during widespread community transmission, unless it is physically impossible or poses a threat to critical national security interests.

The Board will authorize changes in on-site staffing based on public health data and best practices as determined by CDC and other public health experts. On-site staffing will not exceed OMB- or CDC-defined workplace occupancy limitations as described in Section III, *Workplace Operations*. Employees currently working remotely on a frequent or regular basis (e.g., if on an expanded remote work schedule, such as “maximum telework”) will be given thirty (30) calendar days advanced notice and guidance before being required to return to the physical workplace on a recurring basis.

In accordance with DNFSB Notice N-125.1, *Telework Program*, unless superseded, whenever feasible and consistent with agency operational needs, supervisors shall allow telework for employees who have self-identified as being within one or more of the following groups: (i) individuals at higher risk from COVID-19; (ii) individuals with household members who are at higher risk from COVID-19; and (iii) individuals who lack child or elder care due to the COVID-19 pandemic. Determinations of individual risk should be made in accordance with CDC guidelines; see [“People with Certain Medical Conditions”](#); [“Older Adults”](#); and [“Other People Who Need Extra Precautions”](#).

Approved use of leave or telework will not result in discrimination or disparate treatment in terms of ratings, work assignments, or other conditions of employment.

Face Masks/Coverings. Pursuant to the President’s Executive Order (EO) on Protecting the Federal Workforce and Requiring Mask-Wearing, effective January 20, 2021, on-site DNFSB employees, contractors, and visitors must wear a face mask/covering consistently that covers the nose and mouth, and comports with any current CDC and OSHA guidance, as discussed below. If an individual employee is unable to comply with this requirement due to an existing medical condition or religious beliefs, that individual should submit a request for information regarding the reasonable accommodation process to DNFSB’s DHR at dpm@dnfsb.gov.

Contractor personnel who are unable to comply with this requirement due to an existing medical condition or for religious beliefs, should have their employer notify the appropriate DNFSB Contracting Officer or Contracting Officer Representative to discuss available contract flexibilities.

CDC guidance states that the use of face masks/coverings will slow the spread of COVID-19. Employees should visit the [CDC website](#) to obtain more information on the different types of recommended masks, how to properly wear masks, how to store and clean masks, and other considerations related to masks.

Acceptable Face Masks/Coverings: Currently, the CDC has recommended the following: Non-medical disposable masks, masks that fit properly (snugly around the nose and chin with no large gaps around the sides of the face), masks made with breathable fabric (such as cotton), masks made with tightly woven fabric (i.e., fabrics that do not let light pass through when held up to a light source), masks with two or three layers, and masks with inner filter pockets. As CDC updates its guidance on masks, DNFSB will communicate the latest information to employees to ensure employees are able to comply with the up-to-date information.

DNFSB Pandemic Response and Recovery Plan Revision 1

Unacceptable Face Masks/Coverings: Based on CDC guidance, the following masks are not currently considered to be acceptable methods of complying with requirements in DNFSB facilities: novelty/non-protective masks, masks with ventilation valves, bandanas, gaiters, face shields, or goggles as a substitute for masks. Goggles or face shields do not cover the nose and mouth and have large gaps below and alongside the face, where your respiratory droplets may escape and reach nearby individuals. However, face shields may be acceptable in limited circumstances as an accommodation for a DNFSB employee, visitor, or contractor with a documented medical condition.

Masks for Building Occupants: To the extent funds are available, DNFSB will provide a face mask/covering to federal employees, on-site contractors, and visitors who need a mask upon entering DNFSB workplaces. DNFSB may bar entry to people who are not wearing a suitable mask (and, if applicable, do not have an approved accommodation).

Wearing Masks in Common Areas: Appropriate masks must be worn in any common areas or shared workspaces (including, but not limited to, open floorplan office space, cubicle embankments, conference rooms, and restrooms).

Wearing Masks Outdoors: Masks should be worn in outdoor shared spaces when physical distancing cannot be maintained.

Adaptations and Alternatives: As noted above, DNFSB recognizes that wearing a mask may not be possible in every situation or for some people. Wearing masks may be difficult for some people with sensory, cognitive, or behavioral issues. If an employee or contractor is unable to wear a face mask/covering properly or cannot tolerate a mask/covering because of a documented medical condition or religious belief, the individual should submit a request for information regarding the reasonable accommodation process. Employees should send requests to DHR at dpm@dnfsb.gov. Contractors should send requests to their Contracting Officer and/or Contracting Officer Representative.

Exceptions: An individual's face mask/covering can be temporarily removed when the individual is alone in an office with floor-to-ceiling walls and a closed door or for a limited time when eating or drinking and maintaining distancing in accordance with CDC guidelines. Individuals without an office can request temporary private space for eating and drinking from their supervisor. Also, individuals may be asked to briefly lower their face mask/covering for identification purposes to comply with safety and security requirements. However, face masks/coverings should be worn consistently at all other times.

Note: A face mask/covering is not a substitute for social distancing.

The supervisor of any employee refusing to wear a mask inside a DNFSB facility should take the following steps:

- First, remind the employee of the Government-wide policy on wearing a mask.
- If the employee is a contractor, notify the program manager, Contracting Officer and/or Contracting Officer Representative.
- If the employee raises a medical or religious issue as the reason for not wearing a mask, the supervisor should follow the agency's process to review and consider what, if any, reasonable accommodation should be offered. Employees who require reasonable accommodations should contact dpm@dnfsb.gov for information about submitting a request. Employees of contractors who require reasonable accommodations should contact their supervisors and request that the supervisor discuss the need with the relevant Contracting Officer.

DNFSB Pandemic Response and Recovery Plan Revision 1

If the employee is not eligible for an accommodation and fails to comply with the mask requirement, the supervisor should consult with the Division of Human Resources about taking disciplinary action, up to and including removal from federal service.

Testing. DNFSB will refer employees who develop symptoms or have a known or suspected exposure to COVID-19 to get a diagnostic test from a testing facility or a local healthcare institution in accordance with CDC guidance. This diagnostic testing is not mandatory; employees may instead choose to utilize the time-based criteria provided in *Quarantine and Isolation*. However, employees may be required to be diagnostic or screening tested in accordance with local, state, or other federal guidance or requirements or in accordance with Department of Energy (DOE) site access requirements, particularly when on official travel.

Per current CDC guidance, most employees who are fully vaccinated against COVID-19 do not need to quarantine or be tested if they are exposed, if they show no symptoms; however, they should continue to monitor for symptoms of COVID-19 for 14 days following an exposure.

Contact Tracing. A DNFSB federal employee who has returned to the workplace shall immediately report any suspected or confirmed contraction of COVID-19 to the COVID-19 notification email address at COVID-19Notifications@dnfsb.gov. If an employee reports their COVID-19 case to a supervisor, the supervisor will ensure DHR is notified within two hours. DHR will maintain a COVID-19 Incident Report for DNFSB, and it will be considered highly sensitive in nature.

DHR will contact an employee who has contracted COVID-19 or is suspected of having COVID-19 to obtain detailed information about his or her work contacts and locations he or she has been within DNFSB facilities 48 hours before the onset of symptoms through the date of contact. DHR will work with supervisors and the Division of Operational Services as appropriate to determine potentially affected locations and other employees who may have been potentially exposed. DHR will immediately make notifications to all employees who have been potentially exposed but will not reveal the identity of the employee who tested positive for COVID-19.

Employees who have been potentially exposed are defined as those who have had close contact (defined as being within 6 feet of a person for at least 15 minutes cumulatively over a 24 hour period) with a person with COVID-19 up to 2 days before symptoms appeared, or if the person with COVID-19 does not have symptoms, then 2 days before the specimen was collected for testing. Employees who have been potentially exposed may be required to quarantine for 14 days (refer to *Quarantine and Isolation*) and may telework if able. DHR will advise these employees to self-monitor for [symptoms](#).

DHR will make disclosures to local public health officials as required or necessary to provide for the public health and safety of federal employees and contractors, in accordance with local public health mandates.

DNFSB-contracted administrative and IT staff will adhere to the COVID-19 reporting protocol as defined by their respective employers. The contractor will inform the DNFSB Contracting Officer and/or Contracting Officer Representative (COR) if their employee was inside DNFSB spaces up to seven days before the employee's COVID-19 detection or suspected contraction as defined in the above paragraph. If the employee was in DNFSB spaces up to seven days prior to detection, the DNFSB Contracting Officer will inform the COR, Security Office and Facilities Manager. The DNFSB COR and/or program manager will initiate contact tracing in DNFSB spaces by notifying DHR. The Contracting Officer will ensure contractors continue to meet contract performance requirements.

Travel Protocols. Federal and contractor employees should adhere strictly to CDC, state, and local guidelines before, during, and after travel, regardless of whether the travel is personal or for official business.

DNFSB Pandemic Response and Recovery Plan Revision 1

Private transportation for official travel, when practical, is preferred over the use of public or other communal transportation, in combination with other safety/security guidance.

Official domestic and international travel is limited to only mission critical trips and will be conducted in accordance with applicable CDC guidance and the January 21, 2021, [Executive Order Promoting COVID-19 Safety in Domestic and International Travel](#). Utilizing a risk-based, data-driven assessment process, domestic travel must be approved by the Office Director. International air travel, which requires Chair approval, will also require a recent negative COVID-19 test result prior to departure and quarantine on arrival, consistent with CDC guidelines. Travel in connection with permanent change of station may be authorized by the Office Director.

The Agency may provide more detailed guidance and/or requirements regarding official travel.

Individuals are required to follow CDC guidance following travel, which may require employees to stay at home for a period of time after official or personal travel before they are allowed to return to the workplace (refer to [After You Travel](#)). If required to stay at home in accordance with CDC guidance, federal employees who return from travel will be required to telework upon return for the duration of the CDC quarantine period. Employees who are not telework eligible must work with their management on an appropriate work status to mitigate impacts to the mission of their office to the greatest extent possible.

Symptom Monitoring. If DNFSB employees, contractors, building occupants, or visitors are not feeling well, they must not enter DNFSB facilities. Employees are required to do a self-certification check in accordance with Section IV, *COVID-19 Self-Screening Checklist*, each day before they enter a DNFSB facility. Personnel commuting to the office will be required to perform this self-screening and document its satisfactory completion (e.g., through an email to their supervisor) while at home prior to commuting. Notices to this effect will be posted outside all building entrances.

Individuals not meeting the self-screening criteria will not be permitted to enter the facility. Contractor employees will report back to their employer who will coordinate with the appropriate Contracting Officer Representative or Contracting Officer.

Employees should review the [symptom list on the CDC website](#).

Any employees working at a DNFSB facility who develop any symptoms consistent with COVID-19 during the workday must immediately leave the workplace, isolate, and notify their supervisor. Alternatively, if a supervisor observes an employee with COVID-19-like symptoms at work, the supervisor has a responsibility to ensure the safety of the workforce and should ask the employee to promptly leave the workplace.

If an employee is unable to enter the facility or to telework, a supervisor should advise the employee of leave options, such as: requesting sick leave or annual leave. If an employee has no leave available, supervisors are authorized to approve requests for advance leave or leave without pay in certain circumstances. If an employee chooses not to voluntarily take leave or telework, a supervisor can direct the employee's use of leave in certain situations. Before directing the use of leave, supervisors should consult with DHR and OGC because enforced leave is an adverse action that imposes procedural requirements (i.e., advance notice, an opportunity to reply, the right to representation, and an agency decision).

Out of an abundance of caution, any employee who does not meet the self-screening criteria for three or more consecutive days should follow applicable guidance for contact tracing, quarantine and isolation, and must produce a doctor's note before returning to the workplace.

DNFSB Pandemic Response and Recovery Plan Revision 1

Quarantine and Isolation. Any individual with a suspected or confirmed case of COVID-19 will be advised to isolate, pursuant to CDC guidelines, and in compliance with local laws/regulations where local laws are more restrictive than CDC guidance. Personnel who have had close contact in the past 14 days with someone who has tested positive for COVID-19 must follow CDC's guidance for quarantine unless local guidance for quarantine is more restrictive.

Following a confirmed or suspected case of COVID-19 or a close contact with someone who has COVID-19, employees may be allowed to return to their duty location provided that they meet the CDC's guidance, [When You Can be Around Others After You Had or Likely Had COVID-19](#), or if they provide a doctor's note stating that they are healthy and are able to return to workplace.

Currently, the CDC's guidance states the following:

For symptomatic COVID-19:

You can be around others after:

- 10 days since symptoms first appeared;
- 24 hours with no fever without the use of fever-reducing medications; and
- Other symptoms of COVID-19 are improving³

Most people do not require testing to decide when they can be around others; however, if your healthcare provider recommends testing, they will let you know when you can resume being around others based on your test results. Note that these recommendations do not apply to persons with severe COVID-19 or with severely weakened immune systems (i.e., immunocompromised). Immunocompromised persons or persons who are severely ill with COVID-19 might need to stay home longer than 10 days and up to 20 days after symptoms first appeared and should talk to their healthcare provider.

For asymptomatic COVID-19 (i.e., tested positive with no symptoms):

If you continue to have no symptoms, you can be with others after 10 days have passed since you had a positive viral test for COVID-19. Most people do not require testing to decide when they can be around others; however, if your healthcare provider recommends testing, they will let you know when you can resume being around others based on your test results. If you develop symptoms after testing positive, follow the guidance above for symptomatic COVID-19.

For close contacts (i.e., anyone who has been around a person with COVID-19):

Anyone who has had close contact with someone with COVID-19 should stay home for 14 days **after their last exposure** to that person. However, anyone who has had close contact with someone with COVID-19 and who meets the following criteria does NOT need to stay home:

- Someone who has been fully vaccinated and shows no signs of symptoms of COVID-19.
- Someone who has COVID-19 illness within the previous 3 months and has recovered and remains without COVID-19 symptoms.

Confidentiality and Privacy. All information collected from DNFSB employees, contractors, and visitors to DNFSB facilities in connection with the implementation of this Plan, including but not limited to names and contact information, COVID-19 screening information, test results, any information obtained as a result

³ Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation.

DNFSB Pandemic Response and Recovery Plan Revision 1

of testing and symptom monitoring, and any other personal and/or medical information, will be treated confidentially and in accordance with applicable law and Government-wide policy. Within DNFSB, this information will be accessible by and disclosed to only those who have a need to know the information in order to carry out the requirements of this Plan. In addition, this information will be disclosed outside of DNFSB, for example, to other federal agencies and local public health officials, only as permitted by applicable law and policy and only to those individuals and entities with a need to know in order to protect health and safety.

Contact DNFSB DHR with any questions regarding documentation, including how to address any information collected.

Vaccinations. An employee's decision to receive a COVID-19 vaccination is voluntary. At this time, federal and contractor employees should follow the vaccination plans of the jurisdiction (e.g., state) in which they live or work. DNFSB will provide documentation, if required, and as appropriate, to provide proof of employment for purposes of receiving a vaccination. All DNFSB federal and contractor employees are highly encouraged to get vaccinated in accordance with local processes and CDC guidelines.

DNFSB Pandemic Response and Recovery Plan

Revision 1

III. Workplace Operations

Occupancy. No DNFSB workplace should operate above 25% of normal occupancy standards at any given time during periods of high community prevalence or transmission (as determined by OMB and CDC). Exceptions to this policy must be cleared by the DNFSB Chair as advised by Office Directors and the Pandemic Response Working Group and in consultation with the Facility Security Committee and Small Agency Council. Exceptions to the occupancy standard will be considered based on the business needs of the organization and can only be submitted by an Office Director.

In consultation with the Working Group, Office Directors will develop an on-site staffing plan that outlines required employee staffing levels (i.e., full-time on-site, occasionally on-site, or fully remote) given local conditions and authorized work to ensure that their on-site presence is understood. Additionally, Office Directors will manage on-site staffing to ensure that the total number of federal employees, contractors, and visitors are maintained as per occupancy limitations. Where appropriate, Office Directors should incorporate strategies to stagger DNFSB employees and contractors' work times to reduce density, minimize traffic volume in elevators, and avoid crowds during commuting. While DNFSB has operated well under 25% of normal occupancy standards, DNFSB may periodically monitor occupancy levels using anonymized security access data to validate that the agency has been operating under the occupancy limit.

DNFSB employees working in field locations will coordinate their on-site presence with the Department of Energy or other external organizations as appropriate to ensure compliance with local occupancy limits.

Physical Distancing. To the extent practicable, all DNFSB employees, contractors, and visitors will be asked to maintain distance of at least six (6) feet from others at all times, including in offices, conference rooms, and all other communal areas and workspaces, consistent with CDC guidelines. DNFSB has notified employees and contractors to maintain physical distance of at least six (6) feet through DNFSB's email communication and signage that is posted throughout DNFSB headquarters. Visitors entering the headquarters building will see signage noting the physical distancing requirement. Physical distancing shall be practiced at all headquarters building entrances. DNFSB will continue to inform employees, contractors, and visitors of this requirement. Employees who encounter difficulties maintaining physical distancing should inform their supervisor if appropriate. Note: Distance is not a substitute for wearing face masks/coverings; individuals must both maintain distance and properly wear face masks/coverings.

DNFSB will maintain adequate COVID-19 related visible signage at DNFSB headquarters and will continue to refresh signs and distribute them as necessary. DNFSB's signage informs employees of COVID-19 related messages to encourage social distancing practices.

To encourage physical distancing between personnel in conference rooms and other shared spaces, DNFSB has posted signage in shared spaces which indicates to personnel there is a limitation on seating. Additionally, stairwells may be directionally restricted as per posted signage (except in the event of an emergency).

Environmental Cleaning. DNFSB headquarters common areas will continue to be cleaned and sanitized daily by the building custodial services vendor using EPA-approved products and following CDC standards directed to building lessors from GSA. These standards include the routine cleaning and disinfecting of high-touch surfaces in common and high-traffic areas. These high-touch surfaces include, but are not limited to: handrails, door knobs, light switches, countertops, table tops, water faucets and handles, elevator buttons, sinks, toilets and control handles, restroom stall handles, toilet paper and other paper dispensers, door handles and push plates, and drinking fountain controls in common and high-traffic areas.

In accordance with CDC and GSA guidelines, enhanced cleaning in an office space is required when it has been three days or less since a person who is sick or diagnosed with COVID-19 has been in the building.

DNFSB Pandemic Response and Recovery Plan Revision 1

If more than three days have passed since the person who is sick or diagnosed with COVID-19 has been in the building, no enhanced cleaning is needed.

The ability to respond quickly with standard, cost-effective, and CDC-approved cleaning protocols following a reported case is required for DNFSB to safely sustain on-site operations at a facility. DNFSB also must have the ability to report and trace any confirmed or presumptive positive case of COVID-19 inside of its facilities.

DNFSB has the responsibility to inform the building Facility Security Committee and GSA of a confirmed or suspected case of COVID-19 if the individual had been in the building up to three days prior. DNFSB will provide the date and time of the incident and areas accessed. This notification will be confidential and not include personally identifiable information.

GSA will fund and provide for detailed deep cleaning and disinfection of those portion(s) of the facility accessed by the infected individual(s) according to CDC guidance, which may exceed GSA's National Custodial Specification or as otherwise described in the lease agreement.

Hygiene and Sanitization. All cleaning and disinfectants are EPA-approved, and communication plans will also include these healthy practices. Hand sanitizer stations are available in the elevator lobbies of DNFSB headquarters. Personnel are encouraged to wash their hands with soap and water or use hand sanitizer or alcohol-based hand rubs frequently.

DNFSB will continue to refresh and distribute hygiene etiquette signage throughout its facilities to encourage employees to use healthy hygiene practices, such as covering coughs and sneezes, washing hands correctly, and keeping hands clean, to help stop the spread of COVID-19.

Ventilation and Air Filtration. The heating, ventilation, and air conditioning (HVAC) at DNFSB headquarters has been designed to bring adequate fresh air throughout the building based on occupancy level, simultaneously displacing existing air, while reducing recirculation. This system eliminates the need to have windows. Due to COVID-19, property management has increased the number of air exchanges above the minimum required by OSHA. At headquarters, building air filtration is primarily done through Minimum Efficiency Reporting Value (MERV) 13 filters. This system will be supplemented by portable air purifiers with high-efficiency particulate air filters.

Visitors. Every effort should be taken to limit visitors to DNFSB facilities, including conducting virtual visits when possible. Visitors shall be limited to federal government and contractor employees and will only be permitted entry to DNFSB space with a negative COVID-19 self-screening certification.

Visitors, like employees and contractors, will be required to wear face masks/coverings and follow social distancing protocols. Visitors must adhere to the screening signage posted visibly at all entrances of DNFSB facilities, which direct visitors to conduct self-assessments by responding to questions and assess whether to enter the DNFSB facility based on those questions, and outlines next steps they should take if they answer "yes" to any of the questions.

Until further notice, visitors will only be permitted to DNFSB spaces if pre-approved by the Chair (or others designated by the Chair) or if the visitors are contractors performing facility work under the supervision of the Office of the General Manager. To help ensure this, non-DNFSB employees with access to DNFSB space (e.g., Department of Energy, Nuclear Regulatory Commission) may temporarily have their unescorted access disabled.

Visitor requests must be submitted to Receptionist@dnfsb.gov and Security@dnfsb.gov 24 hours in advance of any visit. Visit request must include the following information:

DNFSB Pandemic Response and Recovery Plan Revision 1

- Visitor(s) name (Last, First MI)
- Visitor(s) Company/Agency/Affiliation
- Visitor(s) email address
- Date and time of visit
- Duration of visit
- Any requests for accommodation (for medical reasons)
- Name (Last, First MI) and phone number of the sponsor/escort

The receptionist and/or security will respond with an informational email with COVID-19 self-certification guidance requiring a self-certification response by email. The DNFSB receptionist and/or security will only approve the visit following a negative COVID-19 self-screening certification.

Visit requests for Department of Energy's Office of the Departmental Representative should be processed through the Office of the Technical Director. Visit requests for Nuclear Regulatory Commission (NRC) employees should be processed through DNFSB's Office of Inspector General (OIG) Liaison.

Elevators. Face masks/coverings must be worn inside elevators. Individuals are encouraged to use the stairs if they are physically able to do so. At DNFSB headquarters, elevator occupancy should be limited to two (2) persons. Any changes to elevator occupancy limits will be determined by the Facility Security Committee.

Shared Spaces. At DNFSB headquarters, signage will be displayed at the entrances as well as throughout workspaces, and the mask requirement and physical distancing will be observed. The frequency of cleaning services of high touch surface areas as well as the regular cleaning will continue. Additionally, to the extent practicable, all employees will be expected to disinfect touched surfaces in shared spaces after use.

The following practices are followed at DNFSB headquarters:

- Kitchens will be open using social distancing-informed occupancy limits posted on clearly displayed signage.
- The 7th floor locker/shower rooms and the M-level fitness center will be closed until further notice.
- Restrooms should be limited to three (3) people, if possible. Use of the middle stall and middle sink in the rest room should be preferentially avoided to maximize social distancing.
- Employees and contractors in the DNFSB headquarters building common areas (i.e., areas shared with other building tenants, including the building lobby) will be expected to follow signage and any other directions adopted by the Facility Security Committee.

**DNFSB Pandemic Response and Recovery Plan
Revision 1**

IV. COVID-19 Self-Screening Checklist

Review this each day before reporting to a DNFSB facility. Please read each question carefully.

1. Have you newly or unexpectedly experienced any of the following symptoms in the past 48 hours?

- Fever or chills
- Shortness of breath or difficulty breathing
- Muscle or body aches
- New loss of taste or smell
- Congestion or runny nose
- Diarrhea
- Cough
- Fatigue
- Headache
- Sore throat
- Nausea or vomiting

2. Are you isolating or quarantining because you tested positive for COVID-19 or are worried that you may be sick with COVID-19?

3. Are you fully vaccinated OR have you recovered from a documented COVID-19 infection in the last 3 months?

To be considered fully vaccinated, you must be ≥ 2 weeks following receipt of the second dose in a 2-dose series or ≥ 2 weeks following receipt of one dose of a single-dose vaccine.

4. Have you been in close physical contact in the last 14 days with anyone who is known to have laboratory-confirmed COVID-19 OR with anyone who has symptoms consistent with COVID-19?

Close physical contact is defined as being within 6 feet of an infected/symptomatic person for a cumulative total of 15 minutes or more over a 24-hour period starting from 48 hours before illness onset (or, for asymptomatic individuals, 48 hours prior to test specimen collection).

5. Are you currently waiting on the results of a COVID-19 test?

IMPORTANT: Answer “NO” if you are awaiting the results of a pre-travel or post-travel COVID-19 test.

6. Have you traveled within the past 10 days?

Travel is defined as any trip that is overnight AND on public transportation (plane, train, bus, Uber, Lyft, cab, etc.) OR any trip that is overnight AND with people who are not in your household.

If you answered **YES** to **QUESTION 3** and **NO** to **QUESTIONS 1 AND 2** OR if you answered **NO** to **ALL QUESTIONS**, access to DNFSB facilities is permitted. Employees and contractors should inform their manager/supervisor that self-screening has been satisfactorily completed.

If you answered **NO** to **QUESTION 3** and **YES** to **ANY OTHER QUESTION**, please stay at home and do not enter DNFSB facilities. Seek medical care as needed. Employees and contractors should contact their supervisor for further instruction. Visitors should contact whoever scheduled your appointment.

Revision 1**

V. COVID-19 Incident Notification and Cleaning Protocol

During the occurrence of a COVID-19 incident, the following protocol is followed.

Overview:

- The supervisor reports the incident to the Division of Human Resources.
- DHR ensures the COVID-19 Incident Report is completed and notifies the following key personnel:
 - Executive Director of Operations
 - General Manager
 - Facility Maintenance Manager
- The Facility Maintenance Manager notifies GSA and appropriate property management staff who oversee custodial staff of the area(s) that need to be deep cleaned and sanitized.
 - In accordance with CDC and GSA guidelines, enhanced cleaning in an office space is required when it has been three days or less since a person who is sick or diagnosed with COVID-19 has been in the building.
- Once cleaning is completed, property management and/or custodial staff notifies the Facility Maintenance Manager that cleaning has been completed.
- The Facility Maintenance Manager notifies DHR, the General Manager, and the Executive Director of Operations that cleaning has been completed.

Notification Protocol:

- Immediately upon receipt or completion of a COVID-19 Incident Report, DHR notifies exposed and/or possibly exposed employees as immediately as possible.
- DHR advises Quarantine/Telework/Weather and Safety Leave as applicable.
- If the information on a positive test is received, notification is provided work-site wide when there has been close contact with other employees confirmed or if there is an inability to confirm employee's exact contacts or building locations.

Cleaning Protocol:

- DHR and the Facility Maintenance Manager ascertains all location(s) the suspected or confirmed employee(s) visited.
- The Facility Maintenance Manager notifies GSA and appropriate property management staff who oversee the custodial staff of the areas(s) that needs to be deep cleaned and sanitized immediately.
- Once cleaning is completed, property management and/or custodial staff notifies the Facility Maintenance Manager that cleaning has been completed.
- The Facility Maintenance Manager notifies DHR, the General Manager, and the Executive Director of Operations that cleaning has been completed.

VI. Coronavirus Disease 2019 (COVID-19) Incident Report

Date (mm/dd/yyyy):	Location/Facility:	Report # (for DHR use):
Organization:	City:	State:

Please answer the questions below and return the completed document to the Division of Human Resources at COVID-19Notifications@DNFSB.GOV. **Do not provide the names or any other identifying information about the individuals involved.**

1. Please describe the incident.

2. Does this incident involve an employee or contractor?

Employee Contractor Other: _____

3. Does this incident involve a confirmed case (tested positive) or a suspected case?

Confirmed Suspected

Please describe the nature of involvement (e.g., employee has tested positive, employee has had direct contact with confirmed case, employee is symptomatic and suspects he/she may have COVID-19). If test information is not available at the time of this report, please contact DHR when it becomes available to update this incident report.

4. Is the individual symptomatic or asymptomatic?

Symptomatic Asymptomatic

If symptomatic, when did the individual first experience symptoms?

**DNFSB Pandemic Response and Recovery Plan
Revision 1**

5. Did the individual come into a DNFSB worksite after becoming symptomatic?

- Yes No

If so, please describe if the individual had any contact (within six feet or further than six feet) with other employees including dates and building locations of those contacts.

6. Where did the individual(s) spend their time in the building (floors, room numbers, work or public areas)? Did the employee or contractor come into close contact (within six feet for a cumulative fifteen minutes or more) of other employees or contractors when last in the DNFSB worksite? What was the nature of the contact? **Employees and/or contractors with whom the individual came into close contact must be instructed to quarantine in accordance with CDC guidance (<https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/quarantine.html>). Please work with DHR to appropriately advise all employees involved and contact DHR when that has occurred to update this incident report.**

7. Is there any other information that you think might be important?

All information about the individuals involved in this incident must be treated confidentially and in accordance with applicable law and policy. Within DNFSB, you must only provide access to or disclose information to DNFSB personnel who have a need to know the information in order to respond to the referenced Incident Report. Do not discuss this Incident Report or any information gathered in response to it with anyone who does not have a need to know. Do not disclose information about this Incident Report to anyone outside of DNFSB without authorization.
