**Subject:** commenting on DOE order 140.1

Hello Friends

I am writing to give my two-cents worth regarding the DOE order 140.1

I attended a presentation by Jonathon Plaue, resident DNFSB inspector at Los Alamos, in Los Alamos, New Mexico on August 15th, 2018 where I learned about the hearing.

Firstly, one of our senators at this meeting, Carlos Cisneros, suggested that this hearing should be in New Mexico. Maybe that will still happen? I fully support this idea.

Secondly, it seems that this order wants to enable the DOE to provide oversight of the DNFSB? Am I reading this wrong? I don't think so. I am totally opposed to this direction.

In fact I will use this opportunity to advocate for more oversight of LANL. And more safety reports so we can be informed of the activities on the hill.

Thank you for your time.
