Dear Mr. Chairman:

Consistent with the Department’s implementation plan (IP) for the Defense Nuclear Facilities Safety Board (DNFSB) Recommendation 98-2, Revision 1, the following provides information regarding the commitment currently due during March 2001 and outstanding commitments due through February 2001. The Department proposes closure of those commitments indicated as complete.

Commitment Due During March 2001

- Commitment 4.2.3, “Development & Production Manual (D&P) 11.8 and Technical Business Practice (TBP) Impact Analysis and DOE-approved Implementation Plan.” This is a new commitment as a result of the revision to 98-2. The purpose of this commitment is to ensure that the requirements for weapon response evaluation are incorporated into the management and operating (M&O) contract for the Pantex Plant and to require the M&O contractor to provide an impact analysis and IP to ensure compliance. As reported through the Department’s letter to the Board dated January 30, 2001, the D&P, Chapter 11.8, was modified through Change 39 to incorporate the guidance for expectations and documentation of weapon response to potential accident environments and stimuli. The Pantex M&O has subsequently completed their impact analysis, as represented by their enclosed letter dated March 28, 2001. The impact analysis states that the requirements of D&P, Chapter 11.8, Change 39, have been implemented through MNL-254543, “Pantex Plant Integrated Safety Management (ISM) Authorization Basis (AB) Manual.” The impact analysis further states that the contractual document, Management Integrated & Controls (MIC) Standards/Requirements Identification Document (S/RID) will be modified to adopt the requirements of Chapter 11.8. As a result of the submission of the impact analysis and the pending change to the MIC S/RID, this commitment is considered complete.
Outstanding Commitments Through February 2001

• Commitment 4.3.1, “DOE-approved BIO Module on Fire Protection and associated TSR and develop a resource-loaded schedule for implementation of improved TSR controls for fire protection.” The DOE-approved BIO Module and TSR was provided to the Board through the Department’s letter dated February 22, 2001. At that time, the IP was not yet available, but is expected to be provided in April 2001.

• Commitment 4.3.3, “DOE-approved BIO Module/TSR for On-Site Transportation and DOE-approved Implementation Plan for On-site Transportation controls submitted.” This commitment is carried over from Commitment 5.6.3 #3 within the original IP. The purpose of this commitment is to improve the existing site-wide TSR controls for on-site transportation of nuclear explosives at the Pantex Plant. The status of this commitment was reported to the Board on February 22, 2001, and remains unchanged.

• Commitment 4.4.2, “Revisions to DOE Orders 452.1, 452.2, and DOE-STD-3015 issued.” This commitment is carried over from Commitments 5.4.2 and 5.5.1 within the original IP. The purpose of this commitment is for the publication of the referenced orders and standards. The previously reported status, provided directly to the Board through the Assistant Deputy Administrator for Military Application and Stockpile Operations letter dated February 22, 2001, remains unchanged.

• Commitment 4.4.3, “Revisions to Albuquerque Operations Office (AL) Supplemental Directives 452.1 and 452.2 issued and Impact Analysis and DOE-approved Implementation Plan (as required).” This commitment is carried over from Commitments 5.4.2 and 5.5.1 within the original IP. The purpose of this commitment is for AL to issue revisions to its supplemental directives to align with the changes to Department of Energy (DOE) Orders 452.1, 452.2, and DOE-STD-3015 and invoke applicability of the revised directives through the existing contract structure for the Pantex Plant. The Pantex M&O contractor will then provide an impact analysis and an IP, if warranted, to achieve compliance with the new requirements. The status of this commitment was reported to the Board on February 22, 2001, and remains unchanged.

• Commitment 4.4.4, “Revisions to Nevada Operation Office (NV) Supplemental Directives 452.1 and 452.2 issued and Impact Analysis and DOE-approved Implementation Plan (as required).” This commitment is carried over from Commitments 5.4.2 and 5.5.1 within the original IP. The purpose of this commitment is for NV to issue revisions to the NV orders to align with the changes to DOE Orders 452.1, 452.2, and DOE-STD-3015 and invoke applicability of the revised directives through the existing contract structure for the Nevada Test Site. The M&O contractor and the design laboratories will then provide an impact analysis and IP, if warranted, to achieve compliance with the new requirements. The status of this commitment was reported to the Board on February 22, 2001, and remains unchanged.
If you have any questions, please contact me at 202-586-4879, or have your staff contact Dan Glenn at 806-477-3182 or Karen Boardman at 505-845-6045.

Sincerely,

David E. Beck  
Assistant Deputy Administrator  
for Military Application and  
Stockpile Operations  
Defense Programs

Dear Mr. White:

In accordance with the terms of the Prime Contract, BWXT Pantex, LLC (BWXT Pantex) has performed an Impact Evaluation of the Development & Production (D&P) Manual AL 56XB, Chapter 11.8. The Compliance Impact Evaluation Table that documents the results of BWXT Pantex' evaluation is attached for your review.

Standards/Requirements Identification Document (S/RID) Change Requests have been submitted to adopt Chapter 11.8 during the next revision of the Management Integrated & Controls (MIC) S/RID, in the following Criteria:

- 1.2.2.a, Hazards Assessments
- 1.3.2.a, Crosswalk to General Section
- 1.3.2.b, Operational Controls
- 1.3.2.c, Safety Standards
- 1.4.2.a, Crosswalk to General Section

The requirements are currently implemented through MNL-254543, Pantex Plant Integrated Safety Management (ISM) Authorization Basis (AB) Manual. Results of the evaluation determined that the new and revised requirements of Chapter 11.8 can be implemented within the budget as currently authorized, and will have no impact on Work Authorization Directives (WAD) or contract line items. BWXT Pantex will maintain its current level of commitments in support of the Authorization Bases (AB) Programs.

If you have any questions, or require further clarification, please contact Virgil Hughes at extension 7797.

Very truly yours,

Scott W. Baker
Contracts Manager
