

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

October 21, 2022

TO: Christopher J. Roscetti, Technical Director
FROM: A. Z. Kline, L. Lin, Z. C. McCabe, and E. P. Richardson, Resident Inspectors
SUBJECT: Savannah River Site Activity Report for Week Ending October 21, 2022

DNFSB Staff Activities: All resident inspectors (RI) traveled to Washington, DC, for briefings and meetings. On October 18–20, 2022, a Board’s staff member was on-site to observe the National Transuranic (TRU) Program (NTP) User Group Meeting being hosted at the Savannah River Site. The Carlsbad Field Office management arranges NTP User Group Meetings that are intended to be scheduled approximately every nine months at different generator site locations. Participants in the meeting discussed updates on the waste inventory status at the Office of Environmental Management and National Nuclear Security Administration TRU waste generator sites and their shipment activities to the Waste Isolation Pilot Plant as part of the national TRU waste management plan. The staff member observed a series of presentations that covered various NTP processes, planned changes, best practices, and lessons learned.
