

**DEFENSE NUCLEAR FACILITIES SAFETY BOARD**

February 26, 1999

**TO:** G. W. Cunningham, Technical Director

**FROM:** M. T. Sautman

**SUBJECT:** RFETS Activity Report for Week Ending February 26, 1999

The Site Rep spent this week participating in two staff reviews at RFETS. Messrs. Kasdorf, Von Holle, Tontodonato, and Leary were at RFETS reviewing residue characterization data early in the week. Messrs. Burnfield, Troan, Hunt, and Kasdorf reviewed deactivation and decommissioning radiological engineering and worker protection issues later in the week. Separate reports will be written for both reviews.

**Recommendation 94-3.** K-H has completed all the B371 Basis for Interim Operations upgrades as committed with one exception. Portions of the fire barrier work will not be completed for a few days. The log out/tag out incident two weeks ago and other recent logistical issues delayed completion of this project past February 24.
