DEFENSE NUCLEAR FACILITIES SAFETY BOARD

Hearing Agenda

Understanding the Safety Posture of the Plutonium Facility at Los Alamos National Laboratory (LANL)

Sessions 1, 2, and 3
Santa Fe Community Convention Center
201 West Marcy Street
Santa Fe, New Mexico 87501

Wednesday, June 7, 2017

Goal: Gather information on (1) the risk associated with current and future Plutonium Facility inventory levels, (2) actions taken by the National Nuclear Security Administration (NNSA) and LANL to address opportunities identified by the Board to minimize material-at-risk, (3) actions to reduce facility risk for long-term operations, and (4) the adequacy and status of safety systems to support current and long term operations.

SESSION 1: Plutonium Facility Safety Controls
5:00–7:00 pm

Objectives:

1. Understand the current safety systems credited in the safety basis for the Plutonium Facility, and their functions related to protection of the public and workers from hazards. For each of these safety systems, identify existing deficiencies and any improvements NNSA has planned to address them.

2. Discuss NNSA’s strategy to ensure the efficacy of Plutonium Facility safety systems for current and future mission needs.

Panel Members:

1. Mr. James McConnell, NNSA Associate Administrator for Safety, Infrastructure, and Operations

2. Dr. Craig Leasure, LANL Principal Associate Director, Operations and Business
